

# **CABLE ASSEMBLY SCHEMES**

## **for Beam Splitter cabling**

### **Change History**

<b>Version</b>	<b>Date</b>	<b>Changes/Reasons</b>	<b>Authors</b>
v1	Nov-Dec 1999	initial suspension cabling	Ceccanti, Dattilo
v2	Feb 2003	added cabling of sensors and actuators on Filter #7	Dattilo, Nenci
v3r0	Aug 2014	Modified cabling for allow new separating roof and new payload (cables F,R,S,T,V) and new F#7 actuation/sensing system (W). Cables U and X suppressed. No more tiltmeters on F#7, more devices on payload.	Berni, Dattilo, Gherardini
v3r1	Oct 2014	Added cables T and Z for connection of LVDT primaries of Filter #7.  Adopted the CW and CCW notation for the motor end switches (previous was FW and BW, but was resulting a bit ambiguous)	Berni, Dattilo, Gherardini
v3r1p1	3nov14	-Change in cable N due to a damage on STP1  - Cable P has been split into cable P and cable Q after request of A.Gennai of keeping piezos and LVDTs on 2 separate feedthroughs.	Berni, Dattilo, Gherardini

## **Informazioni generali**

Ciascun spezzone di cavo va terminato ad una estremità da un connettore circolare 32 poli (tipo presa, con sockets), all'altra estremità con uno o più connettori Lemo multipolari (generalmente tipo spina, con pins). I cavi sono del tipo:

- cavo piatto a 18 o 20 conduttori AWG 24 a coppie intrecciate e schermate singolarmente (cavo STP).
- cavo assemblato in lab a conduttori solidi AWG 18 o AWG 24, isolati in polimide, a coppie ritorte (cavo TP).
- 

## **Identificazione componenti**

- Ciascun cavo è identificato da una lettera dell'alfabeto.
- Il tipo di cavo utilizzato è indicato in prossimità del disegno: la sigla comprende il numero di coppie di conduttori, il tipo di schermatura (STP), la sezione (AWG24). Es.: la sigla **9.STP.AWG24** specifica un tipo di cavo avente 18 conduttori intrecciati e schermati a coppie, di sezione AWG24
- Ciascun conduttore di un cavo STP è identificato da un numero cardinale relativo alla coppia (**1** per la coppia bianco/rossa a seguire fino ad **9** per le altre coppie bianco/gialle), da una lettera (**A** per il conduttore con isolante a strisce rosse, **B** per l'altro conduttore della coppia, **S** per la calza) (es. la calza nella terza coppia, è identificata da **3.S** ).
- Ciascun connettore Lemo è identificato da due caratteri: il primo è la lettera del cavo sul quale è saldato il connettore, il secondo è un numero cardinale, che va da 1 al n. max di connettori Lemo sullo stesso cavo (es. per il cavo **B** terminato da due Lemo, essi sono identificati da **B1** e **B2**)
- I contatti di ciascun connettore Lemo sono identificati dal nome del connettore, seguito dal numero del contatto indicato sull'isolante del connettore (es. il contatto<sup>1</sup> n. 4 che si trova sul connettore Lemo **B3** è identificato da **B3.4**)
- I contatti di ciascun connettore circolare a 32 poli sono identificati da lettere (A-Z, a-z). Per quelli interni vale il pinout serigrafato sul retro dell'isolante, per quelli esterni vale il pinout standard

---

<sup>1</sup> Nel caso di conduttori Lemo, il contatto n. 1 è quello col semicerchio bianco, i successivi sono quelli lungo la linea bianca che parte dal contatto n. 1.

## Legenda

<b>F1 +</b>	motore, fase 1, positivo
<b>F1 -</b>	motore, fase 1, negativo
<b>F2 +</b>	motore, fase 2, positivo
<b>F2 -</b>	motore, fase 2, negativo
<b>FC cw</b>	motore, fine corsa che si incontra quando l'albero gira <u>in senso orario</u> per un osservatore coincidente con il motore
<b>FC ccw</b>	motore, fine corsa che si incontra quando l'albero gira <u>in senso antiorario</u> per un osservatore coincidente con il motore
<b>FC com</b>	motore, fine corsa, comune
<b>RST up</b>	motore, reostato, terminale superiore
<b>RST down</b>	motore, reostato, terminale inferiore
<b>RST com</b>	motore, reostato, comune o cursore
<b>TP sx +</b>	thermal probe, sinistro, positivo
<b>TP sx -</b>	thermal probe, sinistro, negativo
<b>TP dx +</b>	thermal probe, destro, positivo
<b>TP dx -</b>	thermal probe, destro, negativo
<b>Ls</b>	LVDT, secondario
<b>Lp</b>	LVDT, primario
<b>C +</b>	coil attuatore, positivo
<b>C -</b>	coil attuatore, negativo
<b>fbk</b>	accelerometro, feedback
<b>V<sub>H</sub></b>	Voltmetrico alto
<b>V<sub>L</sub></b>	Voltmetrico basso
<b>A<sub>H</sub></b>	Amperometrico alto
<b>A<sub>L</sub></b>	Amperometrico basso

### Cutting and Stripping phase

Data:  
Operator: *F.Berni*  
Bobina di provenienza: spezzoni

### Crimping and Labeling phase

Data:  
Operator: *F.Berni*  
Tempo impiegato (ore):

### Quality Control phase

Date: 18aug14  
Operator: *F.Berni*

### Cleaning and Storage phase

Data:  
Operatore/i:

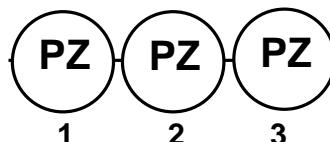

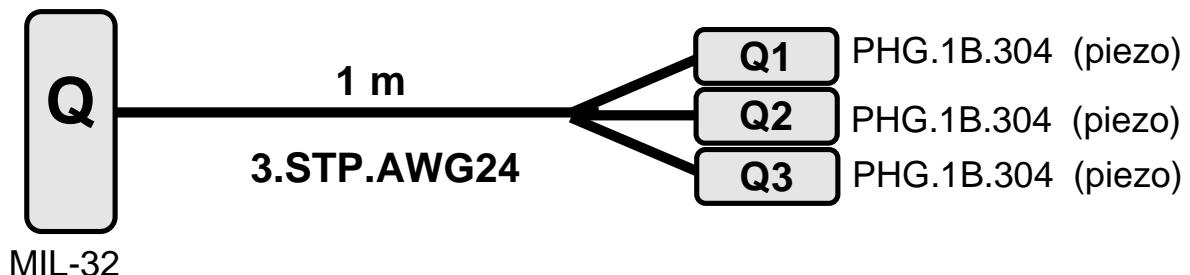

### Notes:

Diramare opportunamente, considerando che gli LVDT sono disposti a 120 gradi lungo i piedi dell'IP.

Modificato il 4nov2014 da *F.Berni*, per rimuovere il cavo dei piezo.

Per lo schema del vecchio Cavo P vedere la versione v3r1.

## cable T (vacuum side)

### Cutting and Stripping phase

Date:

Operator:

Reel: various spools by RS

### Quality Control phase

Date:

Operator:

### Notes:

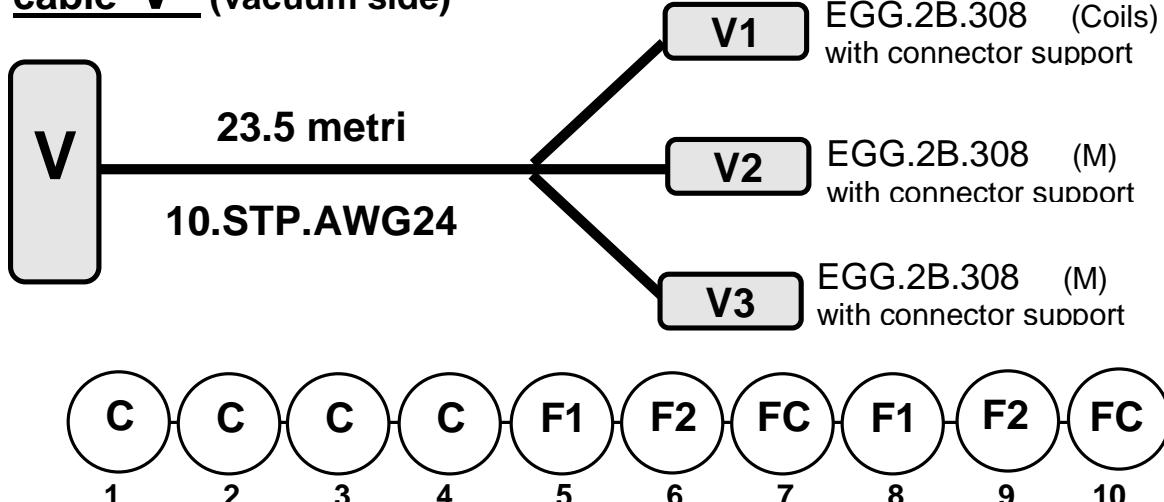

It replaces the old cable T, made with a Gore cable (for the old scheme see version cable\_schemes\_v2)

Standard solid wire, with enamel.

In attesa di sopralluogo e disegni

## cable W (vacuum side)

In attesa di sopralluogo

### Cutting and Stripping phase

Date:  
Operator: *F.Berni*  
Reel: #2 by MWS, AWG 24 HML

### Crimping and Labeling phase

Date:  
Operator: *F.Berni*  
Duration (hours):

### Quality Control phase

Date:  
Operator: *Berni*

### Cleaning and Storage phase

Date:  
Operator: *Berni*

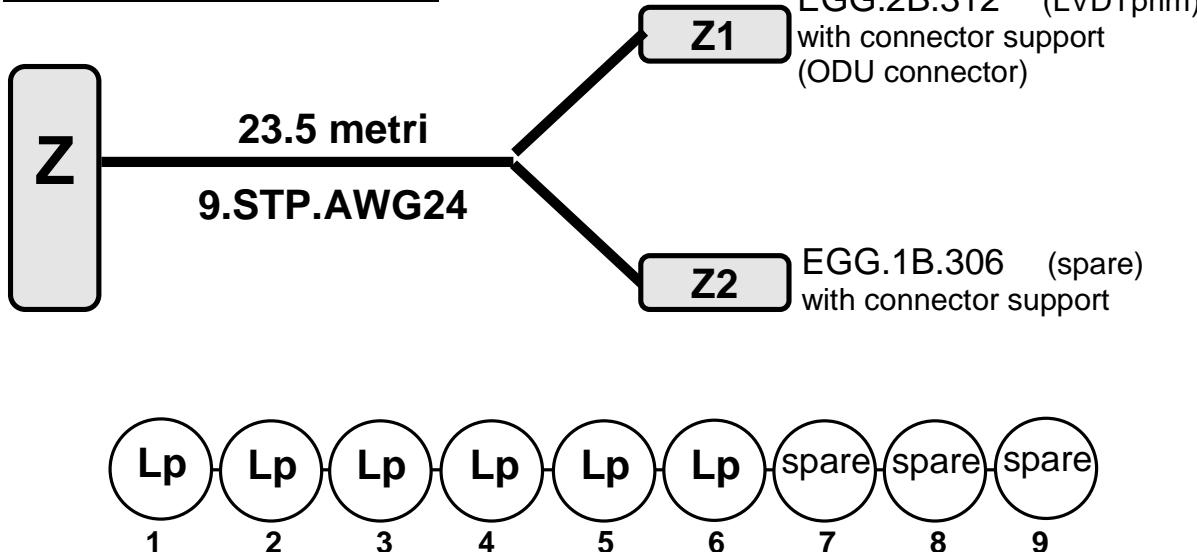

### Notes:

It replaces the old cable W, that was made with a Gore cable (for the old scheme see version *cable\_schemes\_v2*).

The new one is standard solid wire, with Pyre enamel, double (heavy) insulation.
