

CABLE ASSEMBLY SCHEMES

for Beam Splitter cabling

Da chiarire: verso finecorsa motori
Manca schema cavo T, da definire

Change History

Version	Date	Changes/Reasons	Authors
v1	Nov-Dec 1999	initial suspension cabling	Ceccanti, Dattilo
v2	Feb 2003	added cabling of sensors and actuators on Filter #7	Dattilo, Nenci
v3r0	Aug 2014	Modified cabling for allow new separating roof and new payload (cables F,R,S,T,V) and new F#7 actuation/sensing system (W). Cables U and X suppressed. No more tiltmeters on F#7, more devices on payload.	Berni, Dattilo, Gherardini

Informazioni generali

Ciascun spezzone di cavo va terminato ad una estremità da un connettore circolare 32 poli (tipo presa, con sockets), all'altra estremità con uno o più connettori Lemo multipolari (generalmente tipo spina, con pins). I cavi sono del tipo:

- cavo piatto a 18 o 20 conduttori AWG 24 a coppie intrecciate e schermate singolarmente (cavo STP).
- cavo assemblato in lab a conduttori solidi AWG 18 o AWG 24, isolati in polimide, a coppie ritorte (cavo TP).
-

Identificazione componenti

- Ciascun cavo è identificato da una lettera dell'alfabeto.
- Il tipo di cavo utilizzato è indicato in prossimità del disegno: la sigla comprende il numero di coppie di conduttori, il tipo di schermatura (STP), la sezione (AWG24). Es.: la sigla **9.STP.AWG24** specifica un tipo di cavo avente 18 conduttori intrecciati e schermati a coppie, di sezione AWG24
- Ciascun conduttore di un cavo STP è identificato da un numero cardinale relativo alla coppia (**1** per la coppia bianco/rossa a seguire fino ad **9** per le altre coppie bianco/gialle), da una lettera (**A** per il conduttore con isolante a strisce rosse, **B** per l'altro conduttore della coppia, **S** per la calza) (es. la calza nella terza coppia, è identificata da **3.S**).
- Ciascun connettore Lemo è identificato da due caratteri: il primo è la lettera del cavo sul quale è saldato il connettore, il secondo è un numero cardinale, che va da 1 al n. max di connettori Lemo sullo stesso cavo (es. per il cavo **B** terminato da due Lemo, essi sono identificati da **B1** e **B2**)
- I contatti di ciascun connettore Lemo sono identificati dal nome del connettore, seguito dal numero del contatto indicato sull'isolante del connettore (es. il contatto¹ n. 4 che si trova sul connettore Lemo **B3** è identificato da **B3.4**)
- I contatti di ciascun connettore circolare a 32 poli sono identificati da lettere (A-Z, a-z). Per quelli interni vale il pinout serigrafato sul retro dell'isolante, per quelli esterni vale il pinout standard

¹ Nel caso di conduttori Lemo, il contatto n. 1 è quello col semicerchio bianco, i successivi sono quelli lungo la linea bianca che parte dal contatto n. 1.

Legenda

F1 +	motore, fase 1, positivo
F1 -	motore, fase 1, negativo
F2 +	motore, fase 2, positivo
F2 -	motore, fase 2, negativo

cable W (vacuum side)

In attesa di sopralluogo

Cutting and Stripping phase

Date:

Operator: *F.Berni*

Reel: #2 by MWS, AWG 24 HML

Quality Control phase

Date:

Operator: *Berni*

Crimping and Labeling phase

Date:

Operator: *F.Berni*

Duration (hours):

Cleaning and Storage phase

Date:

Operator: *Berni*

Notes:

It replaces the old cable W, made with a Gore cable (for the old scheme see version cable_schemes_v2)

Standard solid wire, with Pyre enamel, double (heavy) insulation.
