

# **DETECTION Tower:**

## **Cables SCHEMES**

### **Change History**

<b>Version</b>	<b>Date</b>	<b>Changes</b>	<b>Author</b>
v1	May-Jun 1999	initial suspension cabling	Dattilo, Ceccanti
v2	Oct 2008	Changes for putting the photodiodes under vacuum. Note: never deployed. It was left only a larger disk on F#7 bottom for clamping more cables	Berni, Dattilo, Gherardini
v3r0	Oct-Nov 2014	Cabling adaptation for AdV:	Berni, Dattilo, Gherardini

## **Informazioni generali**

Ciascun spezzone di cavo va terminato ad una estremità da un connettore circolare 32 poli (tipo presa), all'altra estremità con uno o più connettori Lemo multipolari (generalmente tipo spina). I cavi sono del tipo:

I cavi sono di questo tipo (se non diversamente specificato):

- cavo piatto a 16 conduttori AWG 26 a coppie intrecciate e schermate singolarmente (cavo STP).
- cavo piatto a 16-20 conduttori AWG 24 a coppie intrecciate e schermate singolarmente (cavo STP).
- cavo piatto a 16 conduttori AWG 20 a coppie intrecciate e schermate singolarmente (cavo STP).

## **Identificazione componenti**

- Ciascun cavo è identificato da una lettera dell'alfabeto.
- Il tipo di cavo utilizzato è indicato in prossimità del disegno: la sigla comprende il numero di coppie di conduttori, il tipo di schermatura (STP o PP), la sezione (AWGxx). Es.: la sigla **10.STP.AWG24** specifica un tipo di cavo avente 10 coppie STP, di sezione AWG24
- Ciascun conduttore di un cavo STP è identificato dalla lettera identificativa del cavo, da un numero cardinale relativo alla coppia (1 per una delle 2 coppie laterali<sup>1</sup>, a seguire fino al max 10 per le altre coppie), da una lettera (**N** (o **A**) per il conduttore con isolante a strisce nere (o gialle), **B** l'altro conduttore della coppia, **S** la calza) (es. la calza nella terza coppia appartenente al cavo **E**, è identificata da **E.3S** ).
- Ciascun conduttore di un cavo PP è identificato dalla lettera identificativa del cavo, da un numero cardinale relativo al conduttore (1 per una dei due conduttori laterali<sup>1</sup>, a seguire fino a **14** per gli altri conduttori) (es. il quinto conduttore appartenente al cavo **G**, è identificato da **G.5** ).
- Ciascun connettore MIL32 è identificato da una lettera, uguale a quella del cavo di appartenenza.
- Ciascun connettore Lemo è identificato da due caratteri: il primo è la lettera del cavo sul quale è saldato il connettore, il secondo è un numero cardinale, che va da 1 al n. max di connettori Lemo sullo stesso cavo (es. per il cavo **B** terminato da due Lemo, essi sono identificati da **B1** e **B2**)
- I contatti di ciascun connettore sono identificati dal nome del connettore, seguito dal numero del contatto indicato sull'isolante del connettore (es il contatto<sup>2</sup> n. 4 che si trova sul connettore Lemo **B3** è identificato da **B3.4**).

---

<sup>1</sup> Il conduttore/coppia laterale va definita dall'operatore in sede di preparazione cavo, in quanto una tale marcatura non è già presente sui cavi – è presente solo sui cavi più recenti, gli AWG26, dove la prima coppia ha un conduttore con strisce rosse, anziché gialle.

<sup>2</sup> Nel caso di conduttori Lemo, il contatto n. 1 è quello col semicerchio bianco, i successivi sono quelli lungo la linea bianca che parte dal contatto n. 1.

## Legenda

<b>F1 +</b>	motore, fase 1, positivo
<b>F1 -</b>	motore, fase 1, negativo
<b>F2 +</b>	motore, fase 2, positivo
<b>F2 -</b>	motore, fase 2, negativo
<b>FC cw</b>	motore, fine corsa che si incontra quando l'albero gira <u>in senso orario</u> per un osservatore coincidente con il motore
<b>FC ccw</b>	motore, fine corsa che si incontra quando l'albero gira <u>in senso antiorario</u> per un osservatore coincidente con il motore
<b>FC com</b>	motore, fine corsa, comune

## Cable G (vacuum side)

### Fase di Taglio

Date:  
 Operator: *F. Berni*  
 Reel: *old cable F of BS tower*

### Fase di Crimpaggio e Labeling

Date:  
 Operator: *F. Berni*  
 Duration (hours):

### Quality Control phase

Date:  
 Operator:

### Cleaning and Storage phase

Date:  
 Operator:

### Note:

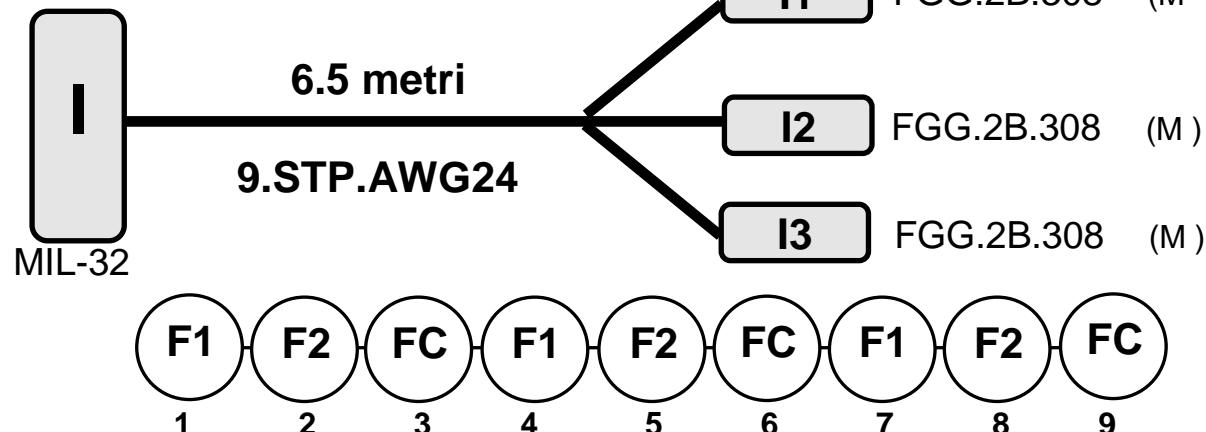

Diramare a 1.5 metri.. Tagliare Ramo G1 e G4 piu' corti di 1 metro,  
 Ramo G2 e G5 piu' corti di 0.5 metri (rispetto a 7 metri).

Rifatto ex-novo ad ottobre 2014. Per lo schema del vecchio cavo G vedere la versione v2.

- obtained by the former F cable of BS tower cabling.
