Agenda of the VESF organizational meeting, April 27 2011

Left overs

Dummy account for testing
User: vesfuser
Password: ask G. Di Biase for it
Works
Reserve a few of the farmn machines for the School. (farmn1 – 5 would be fine)
(Antonella was in vacation, back today I believe. I'll ask whether reservation is possible, I am unsure whether one can block selectively logins)
Page for the School in the wiki.
A schedule is available in
https://workarea.ego-gw.it/ego2/virgo/data-analysis/vesf-da-schools/school-winter-2011/syllabus/

this same area could be used to place material for the students (web pages and files).
Slides of past year in
https://workarea.ego-gw.it/ego2/virgo/data-analysis/vesf-da-schools/school-winter-2010/
Old slides by Elena in the TDS: VIR-0107A-10 , VIR-0108A-10
PUT MATERIAL IN THE WIKI, WHICH IS OPEN, OR IN THE TDS? POST WHERE YOU WANT, WRITE TO ME THE PLACE SO THAT I LINK IN THE WIKI.

Environment dedicated to EM

- All OK with software? Checked, it works on vesf machines.
  - Manual to be handed over to students.
- From mail exchanges, directory access is not uniform between farm and virtual machines, is this an issue?
  - Solved by Giuseppe? Farmn and vesf virtual ones share the same directories.
- How many virtual machines are needed?
  - Four groups of students, so 4 virtual machines. Logistic issue? Groups of two students
  - Ask Giuseppe for 8 virtual machines.
  - Divide students in groups of two over the farm machines. Check whether it is better to reserve a fraction of farm machines.

Stochastic background

VSR1 Data

/data/vesf_rds
/virgoData/ffl/vesf_rds.ffl

> Moreover, the files are visible from farmn2
> but, I can not access to them from olserver14 and olserver17 (two SL4 machines we may use if we encounter problems with SL5). Could you or somebody else make sure that /data/vesf_rds is readable from farmn1,2,3,4,5 and olserver14,17?

Try now .. seems to works ...

WEB areas

Hi Didier,   i forgot to tell you that **"/opt/w3/DataAnalysis/VESF"** in vesf1.virgo.infn.it is different from "/opt/w3/DataAnalysis/VESF" of general Cmplx or Farmnx. I created an Ad Hoc Environment fot Vesf School and if you prefer i can rename directory VESF...
To public some web pages you need to put them in "/opt/w3/DataAnalysis/VESF " by vesf1.virgo.infn.it.

CHECK THAT THE STUDENTS HAVE A PASSWORD FOR THIS AREA.

Hi Giuseppe,

I have tried to create some web pages in
/opt/w3/DataAnalysis/VESF
but when I look at
http://wwwcascina.virgo.infn.it/DataAnalysis/VESF
I see in it only two empty file "pippo" and "pluto".
Could you have a look at that or explain me how is working
this directory VESF?

Thank you,
Didier
